OBJECTIVE

To utilize my knowledge and skills to handle all the career opportunities as a responsible engineer. Work for good productivity and maintaining quality of my firm.

EDUCATION

Sipna College of Engineering and Technology, Sant Gadge Baba Amravati University

B.E. -Bachelor of Engineering (Information Technology)

2018 - 2022

TECHNICAL SKILLS

Frontend technologies : HTML, CSS, BootStrap, JavaScript, TypeScript, Angular14
Programming Languages : Core java, C language
Tools technologies : VSCode, GitHub, Editplus, Notepad

PROJECTS

University Website - HTML, CSS, BootStrap, JavaScript.

- Objective: Providing a user-friendly platform for students to easily look out the university courses which are they provided and all other things which are related to their courses and it helps to manage the college activities and business in a easy way.
- It simplifies the information about campus and facilities by providing a centralized platform for students to search and get the information about university. 🔗

BMI Calculator - HTML, CSS, BootStrap, JavaScript.

- Objective: BMI calculator is to calculate an individual's body mass index (BMI) based on their weight and height, and provide information about their weight status.
- It is commonly used by healthcare professionals to assess a person's weight and to determine if they are at a healthy weight, overweight, or underweight.
- To use a BMI calculator, you enter your weight and height, and the calculator then calculates your BMI and provides a corresponding weight category. 🔗

PROFESSIONAL TRAINING

- Fullstack Web Development At Naresh I Technologies, Hyderabad *NareshIT* 3-Months

LANGUAGES

- HINDI
- ENGLISH
- MARATHI
